

Works Applications Recruiting Internship pre-examination

Update: 10/27/2016

Theme Overview - "Application which supports the supermarket's manager"

You, as an engineer of the software package vendor, are in the process of designing an application software which your customers can increase their profit. In this project, the target of the product is companies which own many supermarkets across the world such as Wal-mart and Tesco. They provide service for a variety of customers. The main users of the product are the managers in the chain supermarkets. The product should support various kinds of users' tasks while giving consideration for the priorities.

What kind of daily work does your product control? When your product will be used? Whatever as you like. Define your product by yourself.

Rule: Online submission (*1) ~ Feedback from Engineer via Skype

Deadline:

Online submission (*1) : 30th Oct, 2016. 23:59 Local time.

You must submit:

Release Note

Please change the name of your file to: FamilyNameGivenName_ReleaseNote

"What is" explanation --- For *1 and *2

Anything like an entrance of the product page which explains your product clearly.

Please change the name of your file to: FamilyNameGivenName_WhatIs

※Please write each document in English.

Optional: You may also submit:

- README

- You will be asked to develop your application during the Internship. So if you want, you can start to think about how to create your product and submit README document.

You can use Microsoft Word, OpenOffice Writer, or other software to write, and export as *.pdf format.

- Screen design

You can submit drawings screens of product.

Please use Microsoft Powerpoint, OpenOffice Impress, or any kind of presentation software, and export as *.pdf format.

Also, you can submit another materials whatever you need. (Assigned storage is limited within 2MB)

Criteria:

- Think deeply and design your product. Please explain each features and their benefits in your documents.
- Assume that your interviewer is your client, and you need to promote your product to them.

Skype Review: 1-2, Nov, 2016.

- You need to explain your document to engineer (your mentor). Think engineer as your client.
- After Skype review, please think more deeply about your product and try to improve it.

**If you have a question, you can ask via Works Applications Recruiting Management system.*
