Plan   **Plan to do today**

1. Rewrite catalog; 2. Establish system develop environment; 3. Implement source code;

Do   **Work you did today**

1. Finished the third edition catalog; 2. Complete establish the dev enviroment; 3. Impletement a tiny demo but works not well.

See   **Success and failure of your work today**

Tune parameters is chanllenging, cause I have little sense of this brand new data. There are still some bugs to be fixed for my prediction model.

Note   **Other notes about your work**

None

Today   **Anything you felt, etc.**

Training procedure need lots of time, and it can not gurantee a good output in limited time.
